DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Petersen 4,657,439. Petersen shows an elongated vertical offshore oil and gas riser of a given diameter in a body of water inherently including the method of using this apparatus (claim 13), with buoyancy can 27 of the type that includes a vertical axial bore 28 through which the riser 15 extends coaxially having a radio-axial slot extending through a side of the can 38 having a width greater than the diameter of the riser (fig. 4).

As concerns claim 11, the combination shows the can including at least one buoyant compartment 50, and wherein the buoyancy of the at least one compartment is adjustable 53.

Allowable Subject Matter

3. Claims 2-10 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims 1-14 have been considered but are moot in view of the new ground(s) of rejection.
